

# Hawkesworth

## Electric vehicle (EV) installation and maintenance for your home

...Leading the charge across the UK

Looking to install a new electric vehicle charger at home?

Installing an EV charge point for your electric car is easier and more affordable than ever before.

Want to take the first steps towards saving money and becoming more **environmentally friendly**?

If the answer is yes, **Hawkesworth** is here to help.

“

*Did you know it costs 56% less to travel 100 miles in an electric vehicle than it does in a petrol-fuelled car?*

”

# Why choose Hawkesworth for your EV installation and maintenance needs?

We'll be there from beginning to end – helping you determine if you are eligible for funding through to which charger is right for you

We're available across the country – our skilled network of engineers will help you wherever you live

We're OZEV accredited – your installation will be in the safest of hands

We offer maintenance – ensuring your EV charger is fully functional and operating efficiently at all times

We also carry out installation and maintenance for businesses, meaning we can help charge your car when you are at home and at work

*We're proud to work in association with ROLEC*

Contact us today and take the first step towards becoming more energy efficient
